### Support Staff Changes in 2009:

- Christine Damon, financial specialist, retired after ten years with the department (see below).
- Carolyn Eaton joined the Geology Museum as a collections curator.
- Peter Sobol is a new senior instrumentation technologist.

Christine Damon retired in December. A financial specialist who also helped things run smoothly in the front office, she did expense reports, billing, and much more. A party to express our gratitude for her ten years of service to the department was held in the Cline Lounge on her last day in Weeks Hall. Of course we miss her and we wish her a fun-filled retirement.
