Len and Charlotte Winters Scholarships

by Dave Mickelson

Leonard Winters has announced a substantial trust that has been set up to provide a number of scholarships for Geology and Geophysics students in the future. Len attended UW-Madison from 1948 until 1951. Like many alumni he has fond memories of the Fred Thwaites' field trips, especially the mapping exercise at Devil's Lake. Len and his wife Charlotte live in the Milwaukee area, where Len is retired from Babcock and Wilcox (now McDermott Inc.) where he was a long time employee. Although not working as a

geologist, Len has always had an affection for geology and would like to encourage future students to pursue a geology career. To further that end, his bequest will support a scholarship for a student from Bayview High School interested in Earth Science and several scholarships for students in our department.

Len and Charlotte were able to join the Geomorphology field trip last fall. They are pictured on page 9 of the *Outcrop*.
